Lip Balm SPF 15

Our lip balm is made from natural Beeswax and Candilla wax. It doesn't have any petroleum products. CCT, an oil made from coconut oil is used for a smooth, non-waxy feel. It has Vitamin E and Aloe Vera for their naturally soothing and healing properties.

Of course, there is SPF-15 protection, because it doesn't make sense to use Lip Balm without protection from overexposure to UVA/UVB radiation from the sun.
